

MUR | WALL ELEMENT

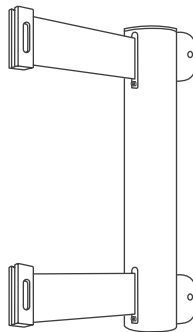

The **Mural Dual** model is the post that offers the most noticeable delimitation thanks to its double belt in every post. Every stanchion has two belts that work the same way: the retracting belt extends to the lock on the next post to create the areas of desired delimitation. Its configuration also lets them be used with wall terminators of the same or another type, and different guiding posts. Thus, you have a lot of options that adapt to your needs.

Conceived for an intense day-to-day use. Customizable belt with colours as well as logos and texts.
