

WALL | INDUSTRIAL USE

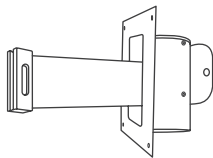

Wall Fix model. Its main characteristic is that it is fixed to the wall, unlike other wall models. Perfect to close hallways to delimit the passage of people. Its configuration also makes them combinable with a wall terminator of the same or a different type, and other guiding posts. Thus, you have a wide range of configuration options to best fit your needs.

Conceived for an intense day-to-day use. Customizable belt with colours as well as logos and texts.
